SPECIAL BARGAINS

In These Small Budded

APPLE, PEACH, PLUM TREES, ETC.

FROM \$5⁰⁰ TO \$15⁰⁰ PER ACRE

You can plant an Orchard of these small, full of life trees. Plant them 22 feet by 22 feet each way, and this will require but 100 trees to plant one acre; they soon make fine bearing trees that will pay you a handsome profit for many, many years.

They are not culls, but are number one little trees that will make for you, in one year, trees up as high as your head, and often begin to bear the next year after planting.

We have in these the very best varieties known, and can send them right to your door by mail. We guarantee them to be first class, free from disease and insects, and to please you or your money refunded. We will pay transportation both ways on any of these small trees that are not absolutely satisfactory in every respect.

A small investment for enough of these trees to plant a few acres will make you independent for the balance of your life.

GRAPE VINES

3c ea. \$3 per 100 \$30 per 1000

These are well rooted grape vines (not merely cuttings). They were set out late and did not make large vines. They will grow off well and make fine vines in one year. We have in this grade: Concord.

ALL AMERICAN

RED, WHITE and BLUE

GRAPE SPECIAL

12 Two-year-old vines for 60^c

12 two-year Vines; 4 red, 4 white, 4 blue, of the very best sorts, that will ripen at different times, all delivered to your door, for 60c. (Our selection of the varieties).

READ WHAT THIS CUSTOMER SAYS

Gentlemen:

In the Spring of 1939 I bought twenty-four fruit trees from you — apple, peach, pear and plum trees. I never lost a tree and the growth

they have made is wonderful. I have been buying stock for the last twenty years from companies from all parts of the United States and you gave me the best bargain I ever bought in fruit trees.

They were packed so they would carry two weeks without being dry — no stunted or moss covered trees in your stock.

Respectfully,

W. T. MORRIS,
614 Chestnut Ave.,
Bridgeton, N. J.

YOUNGBERRY

The new Youngberry has achieved the greatest success ever scored by any of the berry family. It not only bears very heavily but the fruit is easy to handle; it is very attractive, ships well, keeps well. It has so many commercial possibilities and it fits in so well in the home garden that everybody should be interested in having a few vines or a commercial planting. The Youngberry is the result of the careful and patient efforts of Mr. Young in crossing the Loganberry and the Texas Dewberry. It has given the world its choicest bush berry with characteristics in size, appearance, flavor and general usefulness that has opened new possibilities in berry culture.

Youngberries are universally liked and easily grown. They are among the largest berries; of dark wine color, have a minimum of seed, highly favored and yield a rich looking cherry colored juice. In the home garden you will find that more fruit will be produced from a few Youngberry bushes than any others that will grow on the same amount of ground. Youngberries thrive where any other berry fruits grow but do best in states of the same latitude as Ohio and South.

5c each—50c per dozen,
\$3 per 100—\$25 per 1000

Downing—Fruit rich and subacid.
Stubbs—Excellent quality and enormous size.

Plant the New BOYSENBERRY for Handsome Profits!

Said to be the largest and finest vine berry ever introduced. The Boysenberry is a new variety produced by crossing black berries, raspberries and loganberries. The flavor is very pleasing blend of these varieties. It has few and soft seeds. The plant is very vigorous and hardy, coming through in good condition, without injury, in temperatures as low as 19 below zero. The berries are extremely large, many of the berries getting more than two inches long and over one inch in diameter.

AMERICAN BUSH CHERRIES

The New, Quick-Bearing Cherry—So Easy to Grow, So Sure to Produce

HIGHLY PRODUCTIVE—GOOD FLAVOR—HARDY EVERYWHERE

American Bush Cherries are the result of nearly 40 years of untiring selection work by the great plant wizard, Prof. N. E. Hansen of South Dakota State College

This new fruit is a new development in fruit culture that is gradually changing the method of cherry fruit production throughout the northwest, because of the immense amount of choice quality fruit that can be produced on such small trees on such a very small area of ground.

The fruit which is of large size, good flavor and quality to eat fresh also makes the most wonderful rich flavored, dark purple-red jam of high flavor. The juice makes splendid jelly as well as a not to be forgotten cordial that won't weep long.

Though the fruit of this new cherry much resembles a plum in size and shape, it comes massed in clusters and at times almost completely covers the limbs. The tree itself grows in a sort of dwarf bush-like shape rarely getting over and bearing from the ground up.

EXTRA SPECIAL!!!

FRUITS IN ONE YEAR! Extra Special! Large Two-Year-Old BUSH CHERRIES ready to bear this year. Prices, Postpaid 50c each; 3 for \$1.25; 6 for \$2.25; 12 for \$4.00.

IMPROVED DWARF JUNE BERRY. A good substitute for the large or Swamp Huckleberry. The fruit is borne in clusters, and is reddish-purple in color and changing to a bluish-black. In flavor it is a mild, rich sub-acid, excellent as a dessert fruit or canned. Price: 15c each; \$1.50 per dozen.

PAW PAW or "ARKANSAS BANANA". A small tree with purplish or whitish flowers and handsome foliage. The large fruit is edible and improves by cultivation. Hardy as far north as the middle of Nebraska. Worthy of more extensive planting. Very desirable as an ornamental tree. Price of first class trees: 50 cents each; \$5.00 per dozen.

GOLDEN QUEEN RASPBERRY. A yellow Raspberry that is desirable both as a novelty and for the big, luscious fruit; is wonderfully productive and one of the finest for jams, jellies, etc., as well as dessert. Price: 10c each; \$1.00 per dozen; \$6.00 per 100.

ADAM'S IMPROVED ELDERBERRY
(Originated and introduced from the N. Y. Experiment Station)

A new fruit perfected from the common elderberry. The small white flowers come in large, handsome clusters; very fragrant, handsome, opening in early summer when other flowers are scarce. Fruit black, very profuse; ripening in August. Grows 6 to 8 feet high. Berries are highly esteemed for pies, sauce, cordials, and highly flavored wine which is very refreshing. Everybody likes these improved Elderberries; they are easy to grow and do well everywhere. Price: 50c each; 3 for \$1.00; 6 for \$1.75.

NOVELTY FRUITS

Different from ordinary fruits and should be planted by everyone loving rare specimens. Plant in a small way only as Novelties and they will surprise and well repay you.

ARKANSAS NATIVE PERSIMMON. A very large seedling variety.

THE NEW BRAINARD BERRY. A new tremendously heavy yielding berry for the Central, Southern and Pacific Coast States. A trailing type much harder and better in all other respects than the Himalaya. It is very productive and has large clusters of high quality berries which contain relatively smaller seeds than any other berry of this type. The Department of Agriculture has recommended it as a very worth-while variety and worthy of introduction.

STRAWBERRY-RASPBERRY. Valuable for the extreme North, as the fruit is borne on the young growth, and is of course hardy in any climate. This is an entirely new fruit, both in habit of growth and form of fruit. Bushes grow one to three feet high and are covered with Raspberries in the shape of strawberries.

OZARK WINEBERRY. This interesting plant belongs to the Raspberry family. The fruit is borne in large clusters and each berry is at first tightly enveloped by the large calyx, forming a sort of burr. For jelly making, canning and preserving it is without equal.

OZARK HUCKLEBERRY. This delicious little berry is a native of the Ozark Mountain range, remarkable for its fine flavor, is a choice fruit for jams, pies, and fruit cake. Grows luxuriant, very hardy; a prolific bearer, and when given a small amount of attention produces regular annual crops. Will grow on almost any kind of soil, and when once set is there permanently never having to be renewed.

CRYSTAL WHITE BLACKBERRY. Strange as it may seem, this is a real creamy white Blackberry. Mixed with jet black ones for dessert, it makes a most wonderful dish. The fruit is about the same size as Snyder, with few seeds and quite sweet when fully ripe. The bushes are good, strong growers and very productive. This is not a worthless novelty, but a fruit of real value, and should be in every garden.

SWEET CORN

BARDEN'S WONDER BANTAM SWEET CORN

This matchless Sweet Corn is a cross between Golden Bantam and Early Wonder, the result of which is a Bantam Sweet Corn with all the qualities and sweetness of the old reliable Golden Bantam, but with larger ears set up higher on the stalk. Ears 8 to 10 inches long, filled with 8 rows of broad, rich, golden yellow kernels. Stalk 5 to 6 feet high. Critical market and home gardeners and canners have long been looking for a Bantam Sweet Corn with these improved qualities. One of the big canning companies reports that Barden's Wonder Bantam produces one-third more tonnage per acre than any other Bantam Corn they have ever grown, and will consider using no other in the future. Tests each year have proved it to be as early as Golden Bantam and much more vigorous and productive.

Pkt. 10c; 7 oz. 25c; 14 oz. 45c;
2 1/2 lbs. \$1.00

BLACK MEXICAN SWEET CORN

This is one of the richest flavored, sweetest, and tenderest sweet corns. To many of those who know it, no other variety can take its place. The ears are 8 to 9 inches in length, and are ready for the table in 85 to 90 days. The ripe seed is bulish black, but when in table condition the kernels are pearly white. It is a most desirable second early variety for the home garden.

Pkt. 10c; 7 oz. 25c; 14 oz. 45c;
2 1/2 lbs. \$1.00

COUNTRY GENTLEMAN

This variety is often called the shoe-peg corn, owing to the arrangement of the crowded kernels. It is nearly as sweet as Golden Bantam. It remains tender longer than most sorts. Ears average 9 inches in length; the cob is small and very closely packed with slender, pure white kernels. It arrives at full perfection just in time to succeed the earlier varieties.

Pkt. 10c; 7 oz. 25c; 14 oz. 45c;
2 1/2 lbs. \$1.00

HYBRID SWEET CORN

Hybrid Corns are of value because of their uniformity of growth and maturity, vigor, high yield, and adaptability. They are usually resistant to bacterial wilt.

GOLDEN CROSS BANTAM

The best hybrid sweet corn. Large ears, 12 to 14-rowed. Bred for wilt-resistant, high yield and superlative quality. Grows 7 to 8 ft. high. You will make no mistake in ordering this excellent variety.

Price: Pkt. 15c; 7 oz. 30c;
14 oz. 50c; 2 1/2 lbs. \$1.10

CUCUMBERS

WEST INDIA GHERKIN

60 days. This is the true West India or Burr Gherkin which is quite different from other types of cucumbers. The vines produce an astonishingly large crop of small, burr-like fruits, 2 to 3 in. long and 1 to 1 1/2 in. thick. The bright green skin is covered with fleshy spines or prickles. Excellent for pickling.

STAYSGREEN

The greenest of the Long White Spine Cucumbers. About seven inches long; excellent shape and quality. Begins bearing very early, and picking period extends over a long time.

Pkt. 10c; 3 Pkts. 25c; 1/4 lb. 70c

WHITE WONDER

Color of White Wonder is beautiful pure white. Remarkably uniform in shape and size, averaging 8 inches long by 2 1/2 inches thick. Begins to bear early in the season and continues until fall. Flavor is pleasing and flesh firm and crisp. Aside from the excellent quality of the fruits, White Wonder bears a great quantity of them. A packet of seed will furnish you cucumbers in abundance.

Pkt. 10c; 1 oz. 25c; 1/4 lb. 70c

SNAKE CUCUMBER

Like its name, this curious cucumber resembles nothing so much as a long, green snake. It is often 6 feet in length and is a distinct novelty variety. Seed should be planted early to obtain best results. Excellent for pickling and slicing.

Pkt. 10c; 1 oz. 25c

CHICAGO PICKLING

58 days. Grow 7 in. long and 2 1/2 in. thick. Enormously productive. The fruits are of even size, square-ended and disease resistant. They have a rich dark green skin. Popular for years with leading pickle houses.

Pkt. 10c; 1 oz. 20c; 1/4 lb. 65c

CLIMBING CUCUMBER

A wonderful Cucumber. Vines extra strong, vigorous and great climbers, producing surprising amounts of superior fruit on poles, fences, side of house, etc. Three times the usual crop from the given area can be grown from this variety. Nice green color, and fine for slicing and pickling. Sets fruit constantly throughout the season.

Pkt. 10c; 1 oz. 25c; 1/4 lb. 70c

LEMON CUCUMBER

Similar in size, shape and color to a lemon. Flavor that is sweeter and somewhat different than other cucumbers. They are highly esteemed for pickling, either green or ripe, and for slicing just as the fruits are turning yellow. Will yield four times as many cucumbers as any other variety.

Pkt. 10c; 3 Pkts. 25c; 1 oz. 40c

Plant Swiss Chard for

GREENS GIANT LUCULLUS

55 days. The rich green, fleshy, heavily crumpled leaves of this variety make very tasty "greens." The erect plants attain a height of 2 to 2 1/2 feet. Largely sought after by those who prefer the thick, creamy white stems or stalks which are edible and tender, and may be served as a separate dish like asparagus. The leafy part can be cooked like spinach or turnip-greens, or if desired the whole leaf can be boiled and served as "greens." There is a delicious, delicate flavor not found in either turnips or kale.

Pkt. 10c; 1 oz. 25c

OKRA

WHITE VELVET

Strong, tall-growing, 3 1/2 to 4 feet in height. The pods are about 6 to 7 inches long, white, slender, fleshy, and very tender. Early maturing and extensively grown for home use and local markets.

Pkt. 10c; 1/4 lb. 25c; 14 oz. 75c

DWARF LONG GREEN POD

Early and very prolific. Grows 2 1/2 to 3 ft. tall; pods dark green, fleshy and tender; become 7 to 8 inches long and 1 1/8 inches in diameter; tapered near tip.

Pkt. 10c; 1/4 lb. 25c; 14 oz. 75c

LETTUCE

NEW YORK LETTUCE

80 days. (Wonderful.) Produces immense heads as solid as a cabbage. Blanchers beautifully; crisp, tender and free from bitterness. The perfect heads measure 12 to 15 inches across and frequently weigh 2 to 3 pounds each. Outer leaves tightly overlap and are an attractive rich green. The heart is creamy white and the quality superb.

Pkt. 10c; 1 oz. 20c; 1/4 lb. 60c

BLACK SEEDED SIMPSON

45 days. Splendid non-heading or cutting variety, forming large plants of a bright yellowish green color. Grows quickly, is early and of extra fine quality. The texture of the leaves is brittle and crisp. The flavor is delicate and appetizing.

Pkt. 10c; 1 oz. 15c; 1/4 lb. 50c

PEAS

Fresh Green Peas from Your Own Garden are Delicious!

LITTLE MARVEL

62 days. Extensively grown in Florida for early shipping because of its exceptional quality and yield. The dark green vines are 18 to 20 inches tall, vigorous, and bear pods 3 inches in length, nearly round, square-ended, and well filled with 6 to 7 large, deep green Peas. A sure cropper of unsurpassed sweetness.

Pkt. 10c; 7 oz. 25c; 14 oz. 45c;
2 1/2 lbs. 85c

EARLY ALASKA

50 days. Used extensively for canning; also by market gardeners for a first-early crop. Vines slender, light green, and grow about 2 1/2 feet tall; bear well-filled, square-ended bluish green, round, straight pods 2 1/2 inches in length. Seed small, smooth, and bluish green. Very hardy and productive.

Pkt. 10c; 7 oz. 20c; 14 oz. 35c;
2 1/2 lbs. 75c

THOMAS LAXTON

57 days. This has no superior as an early Pea of medium height. The vines are strong, with large dark green foliage, and grow 2 1/2 to 3 feet tall. They bear a surprising number of dark green pods, blunt-ended, and 4 to 4 1/2 inches long. These are well filled with large, tender Peas which retain their pleasing flavor and sweetness until they begin to harden. Unsurpassed for the home-garden and shipping.

Pkt. 10c; 7 oz. 25c; 14 oz. 45c;
2 1/2 lbs. 85c

AMERICAN WONDER

63 days. Dwarf variety, growing 12 to 14 in. tall and maturing in a few days after Alaska, but of sweeter flavor and wrinkled-seeded. It is particularly suited for the home garden where space is limited. The pods are close to 3 in. long and about 1/2 in. wide, plump, straight and have a blunt end. There are 5 to 7 large delicious peas in every pod. Vines are very profuse bearing, the pods remaining in good condition for a number of days.

Pkt. 10c; 7 oz. 20c; 14 oz. 35c;
2 1/2 lbs. 75c

GROW FRESH VEGETABLES FOR HEALTH GIVING VITAMINS

A FINE VARIETY OF PEAS

AMERICAN DROUGHT-PROOF PEA

Laughs at Drought, Smiles at Rain

American Drought-Proof will do well under a wider range of weather and soil conditions than any other variety. It will grow a crop during the driest, hottest summer months at a time any other variety would be a failure. In the hot, dry localities of the West, this variety will grow a large crop without irrigation and without a single drop of rain falling upon it from seed time to harvest. For midsummer or late summer planting this is the variety to plant. If it rains and the soil is kept moist, this variety will produce as large a crop as any variety we know of; if it doesn't rain, and it gets hot and dry, you will get a crop anyway. The handsome round pods are well filled with from 7 to 10 peas in a pod; quality excellent, sweet and tender, even when the peas are large. Vines grow 2 feet high, and require no support. This is the Pea that will do its best in the North, South, East or West. Don't fail to give it a trial.

Pkt. 10c; 7 oz. 20c; 14 oz. 35c;
2 1/2 lbs. 90c

ONIONS

LONG-BUNCHING ONION

A valuable introduction, on account of its merit, is sure to meet with popular favor for young green onions. It forms no bulb, but produces a long white tender roots as shown by the illustration. Superior to any other hardy bunching onion in that it remains always tender and mild, and owing to quality and fine appearance, it makes an attractive bunch that sells at an advanced price over other varieties. This onion is often blanched 24 inches. With this variety, you can have bunching onions of the very best quality all through the summer. No garden is complete without a row of these onions. A money-maker for market gardeners.

Pkt. 15c; 2 Pkts. 25c; 5 Pkts. 50c

EBENEZER

The Extra Early, Long Keeping, Mild Onion
One of the mildest flavored onions grown. The flesh is white, firm and of a very delicate flavor. The onions are quite similar to Yellow Globe Danvers in shape but much larger in size, yellow skinned and have very small tops and mature early. Many people who know this onion will have no other kind for their own table. In the localities where it has been grown, the onions of this variety command much higher prices than other kinds. Those who want a nice mild onion, either for large onions or bottom sets, would do well to try the Ebenezer. Sets are grown the same as large onions, except that the seed is sown thickly—one pound of seed to each 100 feet of drill. These sets, if planted early in the spring will produce ripe onions in July, at which time they will bring a high price. Sets of this variety rarely produce seed stalks as other kinds do. The Ebenezer is such a good keeper that even those ripening in July will keep sound and hard through the fall and all winter. Don't fail to plant some Ebenezer onion seed this season, sowing some for large onions and some for sets.

Pkt. 15c; 2 Pkts. 25c; 5 Pkts. 50c

KOHL-RABI

A large bulb is produced on the stem, which, if used when young, makes a delicious vegetable, having sweet, fine-grained flesh. It has the combined flavor, not unlike that of both cauliflower and turnip. Sow the seed in rows 12 to 18 in. apart early in the spring and cover 1/2 in. deep. Thin plants to stand 6 in. apart in the row. For a continuous supply, sow every two weeks. One pkt. of seed will sow about 40 ft.; 1 oz. 200 ft.

EARLY WHITE VIENNA. 55 days. The most popular extra-early short-topped variety. The firm, greenish white flesh is of delicate flavor.

Pkt. 10c; 3 Pkts. 25c

OVER 300 ACRES DEVOTED TO GROWING HARDY TREES, PLANTS, SHRUBS, EVERGREENS AND ROSES

**Thirteen Reasons Why You
Should Buy From Us . . .**

- 1—Because we sell you the best trees, plants and vines that can be produced at prices far below what others will ask you for the cheap, worthless kind. Our nursery stock is grown by the best method known to nurseries and no better can be produced regardless of prices. We offer \$100.00 reward for improved method on how to grow better nursery stock.
- 2—Because we repay the postage or express charges on all orders amounting to \$10.00 or more, except Balled or Burlapped Evergreens.
- 3—Because we sell direct to the fruit growers saving you the Agent's or middleman's commission.
- 4—Because we guarantee satisfaction or your money refunded, and we pay postage or express both ways.
- 5—Because we do not belong to any trust or combine, and are free to make our prices just as low as we believe we can afford.
- 6—Because all our trees and plants are guaranteed to be free from disease and insects, and have all been inspected by our State Inspector and each shipment bears a certificate of inspection.
- 7—Because we use every caution to keep all our varieties true to name and should a mistake occur and any variety prove untrue to name we will replace it free of charge or refund the price paid for it.
- 8—Because we grow and offer for sale only varieties that are known to be good fruits and money makers.
- 9—Because Benton County, Arkansas, has many, many acres of varieties of fruits, and we have under our close observation a greater variety of fruits and berries than our competitors.
- 10—Because Ozark Mountain, Arkansas Grown Nursery Stock is now considered by Horticulturists to be the best that can be produced.
- 11—Because trees and plants must be well rooted if success is to be made with them. Ours are the best to be had.
- 12—Because our old customers send us repeated orders and their neighbors send us their orders, a proof that they are well pleased.
- 13—Because we use extreme economy in both growing and selling our nursery stock, thereby saving money for you.

EXCELSA—Similar to Crimson Rambler but superior in color.
CRIMSON RAMBLER—Well known. Bright crimson.
DOROTHY PERKINS—Soft, shell-pink, flower-gin profusely.

Everblooming Climbing Roses

AMERICAN BEAUTY—Deep pink.
COLUMBIA—Clear imperial pink.
KAISERIN AUGUSTA VICTORIA—Creamy white.
MARESHAL NIEL—Lovely pointed yellow buds.

VEGETABLES FROM YOUR OWN GARDEN ARE DELICIOUS

BENTON COUNTY NURSERY'S SEEDS Are SURE To GROW

Green-Pod Bush Beans

TENDEGREEN—STRINGLESS

53 days. Plants make a strong, vigorous growth; are well branched and bear a great quantity of beautiful dark green, round, extremely meaty, tender pods, 6 to 7 in. long. Absolutely stringless at all stages of growth; always free from fiber, and of the most delicious flavor. Pods mature early and are borne profusely for a long time. The attractive appearance of the high quality pods makes them ideal for market or canning. Pkt. 10c; 7 oz. 20c; 14 oz. 35c; 2 1/2 lbs. 75c.

FULL MEASURE—STRINGLESS

54 days. Medium-early, well-branched, round plants bearing a large crop of perfectly stringless, very fleshy, deep green round pods measuring 5 in. in length. Quality is superb and the flavor rich and satisfying. Popular on account of its high yields and long picking season. Pkt. 10c; 7 oz. 20c; 14 oz. 35c; 2 1/2 lbs. 75c.

GIANT STRINGLESS GREEN-POD

51 days. The straight, rather slender pods grow 6 in. long; meaty, round, brittle, and absolutely stringless. Somewhat similar to Burpee's Stringless Green-Pod. Seeds are a light brown color. The plants are of strong growth, compact, and bear a heavy crop of pods for a long time. Pkt. 10c; 7 oz. 20c; 14 oz. 35c; 2 1/2 lbs. 75c.

IDAHO REFUGEE—STRINGLESS

65 days. A truly early Stringless Refugee. It shows high resistance to mosaic, the disease that makes the growing of Green Beans difficult in some sections. Pods are smooth, round, light green, stringless, 4 1/2 to 5 in. long. Pkt. 10c; 7 oz. 20c; 14 oz. 35c; 2 1/2 lbs. 75c.

BOUNTIFUL, STRINGLESS GREEN-POD

48 days. Attractive green pods of the choicest quality; 6 in. long, flat, tender, strictly stringless, and of rich flavor. Matures early. Has proved to be unexcelled on heavy as well as light soils; reliable everywhere. Plants are vigorous, hardy and very prolific, bearing over a long season. Bountiful is the best of the flat green-pod Bush Beans. Pkt. 10c; 7 oz. 20c; 14 oz. 35c; 2 1/2 lbs. 75c.

POLE BEANS

KENTUCKY WONDER OR OLD HOMESTEAD

65 days. We prefer this to all other green-podded pole beans. It is early, climbs well, and bears a heavy crop of large, green, curved pods, 7 to 9 in. long. They are thick and meaty, tender, brittle, and of good quality, showing slight strings as the pods reach full size. Though thick, they appear slender on account of their great length. Pkt. 10c; 7 oz. 20c; 14 oz. 35c; 2 1/2 lbs. 75c.

MISSOURI WONDER

65 days. Round, medium green pods, 6 in. long. Extremely early. Excellent corn hill bean for snaps. Pkt. 10c; 7 oz. 20c; 14 oz. 35c; 2 1/2 lbs. 75c.

WHITE CREASEBACK

68 days. The green pods are 6 in. long, round, deeply creased or saddle-backed, entirely stringless and brittle. The white seeds are fine for baking. Pkt. 10c; 7 oz. 20c; 14 oz. 35c; 2 1/2 lbs. 75c.

Improved GOLDEN WAX BEAN

Undoubtedly one of the best wax beans for the home garden. Rust-proof, an improvement of the old style Golden Wax. Pod is semi-round, yellow, of good quality, and it has no strings. Ready for picking 47 days from planting.

Pkt. 10c; 7 oz. 25c; 14 oz. 45c; 2 1/2 lbs. 85c

BUSH LIMA BEANS

BURPEE'S IMPROVED BUSH—The largest of all Bush Limas, bearing pods almost equal in size to those of the large Pole Limas. Pods 5 to 6 inches long by 1 1/4 inches wide and the full size beans are of luscious flavor.

Pkt. 10c; 7 oz. 25c; 14 oz. 45c; 2 1/2 lbs. 85c

POLE LIMA BEANS

KING OF THE GARDEN—A vigorous grower, requiring but two vines to each pole. Begins flowering early, at the bottom of the pole, producing a continuous bloom and fruitage throughout the season. Pods are large and beans are of excellent quality, well-formed and mammoth in size.

Pkt. 10c—7 oz. 25c—14 oz. 45c 2 1/2-Lbs. 85c

LIMA PEAS

OR FROST-PROOF BEAN—The Lima Pea or Frost-Proof Bean is highly esteemed in Europe, and is known there as the Broad Bean. They are not sensitive to cold, so should be planted as early in the spring as possible. The beans are as large as the largest Lima, and nearly the same shape. The flavor is more like peas than beans. Used like the Lima Bean; delicious either cooked fresh or as a winter shell bean. Wonderfully productive.

Pkt. 10c; 7 oz. 35c; 14 oz. 60c

NEW AND UNUSUAL BEANS THE CHESTNUT BEANS

This wonderful Bean looks like a gigantic pea. When boiled, it has a flavor like boiled chestnuts; one of the most delicious beans grown. Grows in the form of a tall bush and is completely covered with pods. For soup and turkey stuffing it cannot be surpassed. It is a Spanish Bean, and is known as the "Garbanzo." We have but a limited amount of seed to offer.

Pkt. 10c—3 pkts. 25c

GIANTIC TASMANIA BEAN

The Gigantic Tasmania Bean will astonish you with its size and win you with its genuine goodness. The flesh is very tender and of delightful piquant flavor. This bean grows to an enormous size, single fruits weighing as much as 18 pounds. It should be eaten when about 6 pounds in weight if you want it at its best. It is easy to grow and is almost entirely free from disease and insects. Wonderfully prolific, much easier to grow than a squash, and is very productive. It may be grown on a trellis similar to pole beans. It can be prepared for the table in many ways, and when either fried, baked or boiled, it is most delicious in flavor.

Pkt. 10c—3 pkts. 25c

HOPÍ INDIAN BEAN

This Bean has been grown by the Hopi Indians of Northern Arizona from prehistoric times under strictly dry farm conditions and crude farm practices. In trying these out, we find them to be a very fine eating bean. A small crop grown in 1933 and the growers claim that they produced more heavily than any bean we have. They are semi-vining, long rooted, drought-resistant beans, and should be placed in rows 30 to 40 inches apart. They require the full Summer season and should be harvested before frost. They have the true large lima flavor and the Indians claim they are strongly anti-acid, in this being very much different from the usual Navy and Pinto beans and can be eaten with benefit by people who cannot digest most beans. The great productivity of this bean under general climate conditions should make it very popular with gardeners and we suggest that you try out a supply this year.

Pkt. 10c—7 oz. 35c; 14 oz. 60c

CARROTS

SEED VERY SCARCE THIS YEAR

CHANTENAY—LONG TYPE

70 days. A new strain of Chantenay bred to meet the recent popular market demand for longer Carrots. Roots deep orange, smooth, tapered, stump-rooted. The strong, medium tops make it an ideal variety.

Pkt. 10c; 3 pkts. 25c; 1 oz. 50c

NEW CORELESS CARROT

A new rapid growing early variety of superior flavor; tender and without any woody heart or core. Roots are half-long, blunt-pointed and grow to a medium size; are very smooth, and of a deep orange-red color. Highly recommended for market or home use when either young or full grown.

Pkt. 10c; 3 pkts. 25c; 1 oz. 50c

Be Sure To Plant A Vegetable Garden This Spring -- All Food Prices are Going To Increase

GIANT AZTEC BEAN

The Giant Aztec is a real bean; looks like a field or navy bean except that it is 8 times as large. 18 or 20 Giant Aztec Beans usually weigh an ounce, while it takes from 160 to 170 of the common field beans to weigh an ounce. It is a bush bean; will stand more drought than most varieties—very hardy—and probably the most productive bean grown.

The above illustration was reproduced from an actual photograph, to show the comparative sizes of the Giant Aztec Bean with that of the common field or navy bean.

Pkt. 10c—3 pkts. 25c

CHANTENAY — LONG TYPE CARROTS

Danvers Half Long

75 days. A prime favorite because of its brilliant market appearance. The smooth, handsome roots are 6 1/2 to 7 1/2 inches long, tapering uniformly to a blunt point. Flesh is a deep, bright rich orange color, tender, sweet, and crisp. When bunched it makes the most attractive Carrot on the market, thus always selling at top market prices. Our strain is outstanding.

Pkt. 10c; 3 pkts. 25c; 1 oz. 50c

TURNIP ROOTED CELERY

A popular vegetable in Europe. Instead of producing long leaf stalks like ordinary celery, it has a turnip-like root with the true celery flavor and is greatly liked by nearly all who have tried it. Excellent for salads and flavoring, or cooked like parsnips, turnips or oyster plant.

Pkt. 10c; 1/2 oz. 30c; 1 oz. 50c

TABLE BEETS

CROSBY'S EGYPTIAN

48 days. An extra-early variety for home and market garden use. Unexcelled for bunching. Roots are smooth, round, with slightly flattened tops; small tap-root. The flesh is very dark blood-red. Tops are medium and the roots deep purplish red. Crisp and tender.

Pkt. 10c; 1 oz. 30c; 1/4 lb. \$1.00

DETROIT DARK RED

59 days. An early maturing beet of remarkable uniformity. Splendid for the home garden, market, shipping and canning. Perfectly round and of a deep red color. They reach 2 1/2 to 3 in. in size and have a small collar and a thin tap-root. The flesh is very blood-red, showing hardly any zones. It is tender, fine-grained, exceptionally sweet. Medium size foliage.

Pkt. 10c; 1 oz. 30c; 1/4 lb. \$1.00

CABBAGE

LIGHTNING EXPRESS

The Earliest Cabbage in Cultivation

Our Lightning Express is ready for use in 65 to 70 days from sowing—ten days earlier than Jersey Wakefield. Good fair trials of varieties offered by other such houses as "the earliest grown" have proved that they are from four to ten days later than our Lightning Express.

LIGHTNING EXPRESS is positively the earliest cabbage in cultivation. The heads are pointed, of good size, a little smaller than Jersey Wakefield, always sure to head, solid and firm, and always in demand on the market, bringing high prices on account of their extreme earliness. Very hardy, permitting earliest planting. There are but few outer leaves, and plants may therefore be set closely together. As many as 14,000 heads can be grown on one acre of ground, and will bring a larger profit per acre than later and heavier varieties.

Pkt. 10c; 3 pkts. 25c; 1 oz. 50c; 1/4 lb. \$1.65

COPENHAGEN MARKET

One of the finest early round-headed cabbages in cultivation. It is desirable on account of the remarkable characteristics of maturing the heads all at the same time, enabling the grower to gather his crop with less expense and permitting the cleaning of the land at the first cutting. The heads average about ten pounds each in weight, are hard and solid with small core. The quality is extra fine and sweet. It is a short-stemmed variety, the heads nearly resting on the ground. The leaves are light green, rather small, saucer-shaped and tightly folded, making it possible to set them close together in the field.

Pkt. 10c; 3 pkts. 25c; 1 oz. 40c; 1/4 lb. \$1.35

MAMMOTH RED ROCK

By far the best, largest and hardiest heading red cabbage in cultivation; very uniform in size, weight, solidity and deep red color. The heads grow to weigh ten or twelve pounds.

Pkt. 10c; 3 pkts. 25c; 1 oz. 40c; 1/4 lb. \$1.35

PREMIUM LATE FLAT DUTCH

This variety of late cabbage is standard in all sections for winter use. It makes a large solid head, which keeps long without bursting, and is adapted to a more varied climate than probably any other variety.

Pkt. 10c; 1 oz. 25c; 1/4 lb. 85c

CHINESE CELERY CABBAGE

A most delicious vegetable which combines the rich celery flavor with that of the cabbage. Can be cooked or eaten like celery. Makes a good salad as the finest head lettuce. The mid-ribs can be cooked like asparagus, and, for cold slow, no cabbage compares with it—One of the most delicious vegetables yet introduced, and bound to become one of the most popular.

Pkt. 10c; 1 oz. 30c; 1/4 lb. \$1.00

We Pay The Postage On All Seeds

OUR SEEDS ARE AMERICAN GROWN

They Are Tested For Purity and Germination

PEPPERS

CALIFORNIA WONDER PEPPER

California WONDER

75 days. If you want a large, heavy, dark, glossy green Pepper, of the finest flavor, this variety meets your requirements. Produces an abundance of handsome, blocky, 4-lobed, uniform fruits 5 inches in length and 4 inches across, which, when ripe, turn into a brilliant crimson. The thickness of the flesh alone (often $\frac{3}{8}$ of an inch) places it ahead of all other sorts, and makes it a premier shipping variety. Disease-resistant.

Pkt. 10c—3 pkts. 25c

CHINESE GIANT

Most gigantic of all Giant Peppers. A fine mild red pepper of enormous size, magnificent appearance, and brilliant, glossy scarlet color. The flesh is mild and unusually thick.

Pkt. 10c—3 pkts. 25c

LONG RED CAYENNE

(125 days.) A well-known medium early variety, having a slender, twisted and pointed pod about four inches long. Color deep green when fruit is young; when ripe, of a bright red color. Extremely strong and pungent.

Pkt. 10c—3 pkts. 25c

RADISHES

WHITE ICICLE

27 days. Clear white roots which grow to a length of 6 inches, slender and tapering at the tip, brittle as ice and of mild, inviting flavor. A fine variety for both market and home gardeners who want an early, long white Radish.

Pkt. 10c—1 oz. 15c— $\frac{1}{4}$ lb. 45c

Scarlet Turnip White-Tipped

25 days. This Radish is a table delicacy, crisp, tender and sweet. A very deep scarlet with a distinct snow-white tip covering about one-third of the lower part. Medium in size, nearly round, with small tap-root. We offer a high-class, refined strain. Extensively used by truckers and in home gardens. Should be pulled when 1 to $1\frac{1}{4}$ inches in diameter.

Pkt. 10c—1 oz. 15c— $\frac{1}{4}$ lb. 45c

CRIMSON GIANT

28 days. If you desire a Radish of more than two bites, you will find this to your liking. The crimson roots are large, globular, 1 to $1\frac{1}{2}$ inches in diameter. Flesh is white, crisp, and of splendid quality. It grows quickly and remains tender and of fine flavor to the last. Valuable for home-garden use. The white flesh holds its firmness well. The tops are medium small.

Pkt. 10c—1 oz. 15c— $\frac{1}{4}$ lb. 45c

SQUASH

DELICIOUS. Unsurpassed by sweetness, richness of flavor and extraordinary quality. Excellent for fall and winter use; keeps well until late in the spring. Fruits usually weigh 5 to 10 lbs.; rind dark green, mottled in lighter shades; dark orange flesh; very thick and fine grained.

Pkt. 10c—3 pkts. 25c— $\frac{1}{4}$ lb. 50c

VINE PEACH

Ripe fruit in 80 days after seed is planted. This wonderful vegetable Peach is the most beautiful of all vegetables. They resemble oranges in color, shape and size and grow on vines like melons. They present a beautiful and tempting appearance when canned and make delicious preserves and pickles; fine for pies. There is nothing like them. Extremely early; of the easiest culture, and very prolific.

Pkt. 10c—3 pkts. 25c

WONDER BUSH CHERRY

These bushes grow about 18 inches high—and bear heavy crops of the best flavored fruit you ever tasted. Although many use the fruit raw, all claim it makes better pie than tree cherries. The Wonder Cherry, sometimes called Ground Cherry, will bear eight weeks after planting the seed.

Pkt. 10c—3 pkts. 25c

PUMPKIN

JUMBO PUMPKIN

Often weighs 100 to 300 lbs. Always a prize winner at exhibitions. A good pie Pumpkin, splendid keeper and valuable for feeding purposes.

Pkt. 10c—3 pkts. 25c

SWEET POTATO PUMPKIN

Tennessee Sweet Potato is an excellent sort which, when cooked, resembles a sweet potato in flavor, but is of more delicious taste. It is pear-shaped and slightly ribbed. The color is creamy white, sometimes striped with green. Flesh is fine grained and nothing superior for making pies and custards. Matures in 95 days, is hardy and productive, and keeps perfectly sound until in the spring.

Pkt. 10c—3 pkts. 25c— $\frac{1}{4}$ lb. 50c

AMERICAN PIE PUMPKIN

A high quality pumpkin. The flesh is very thick, of a rich salmon color, fine grained, dry and sweet. Seed cavity small. Of medium size, early, very productive and a good keeper. Highly desirable as a pie or cooking pumpkin. The seeds are distinct in appearance, being curiously sculptured.

Pkt. 10c—3 pkts. 25c— $\frac{1}{4}$ lb. 50c

New Climbing Watermelon

A superb variety that may be trained and tied to trellis, etc. Melons about size of large coconuts; crimson flesh of the highest quality; rich and sweet. Fruit ripens for a long period, unlike other sorts which ripen their fruit mostly at one time. An ideal melon for the small garden.

Pkt. 10c—3 pkts. 25c

GARDEN HUCKLEBERRY

The Garden Huckleberry produces from seed the first year. A new fruit that cannot be excelled for pies and preserves. Very prolific, yielding an immense crop of fruit. It is an annual and must be planted each year from seed. Grows and thrives in all climates and on all kinds of soil. The fruits grow larger than the common Huckleberry or Blueberry. If cooked with apples, lemons, or anything sour, they make the finest jelly. You will be delighted and astonished with this easily grown, wonderful novelty.

Pkt. 10c—3 pkts. 25c

MUSKMELONS

SUGAR ROCK

The Million Dollar Melon

A new melon which, for the last four years, has proved to be the most profitable market variety in the melon-growing districts of Michigan, Indiana and Ohio, and is sure to become a leader throughout both the Eastern and Western States. Sugar Rock will stand shipping and handling better than any other high-grade melon and, due to its striking appearance and superior flavor and quality, it is rapidly becoming a favorite, commanding the highest prices in city markets. It is one of the most productive varieties grown. Five to seven perfect fruits, and often more, are produced on one vine. The rind is so tough and the flesh so firm that they can be allowed to ripen on the vine and then shipped long distances and arrive in perfect condition. It averages a little larger and is earlier, maturing its fruits in about 85 days. The fruits are slightly oval—nearly round—and are overlaid with a heavy gray netting. This heavy netting and tough rind is what makes them stand handling and shipping so well. Sugar Rock has deep orange flesh. It is wonderfully sweet and delicious.

Pkt. 10c—3 pkts. 25c— $\frac{1}{4}$ lb. 40c

HEART OF GOLD MUSKMELON

Owing to its superior quality, Hearts of Gold has taken first place on nearly all localities where it has been introduced. It is a good shipper, and just the right size to be served in halves. Average weight $1\frac{1}{2}$ to $1\frac{3}{4}$ lbs. Flesh deep orange, extremely thick, fine grained, of the best quality and very sweet and melting. It is a money-maker for market gardeners and few, if any, are its equal for the home garden. It is a marvel of productiveness. Ripe fruits in 75 days.

Pkt. 10c—3 pkts. 25c— $\frac{1}{4}$ lb. 40c

VEGETABLE SPAGHETTI

This delicious new vegetable from Persia thrives in all climates and in any ordinary garden soil. Each plant produces from six to ten beautiful bright yellow, oblong fruit about 8 to 10 inches long. Each fruit is filled with a delicious spaghetti-like pulp. When fully ripe, the whole fruit (without cutting or peeling) should be cooked 20 minutes in boiling water; then cut in half. A dishful of this delicious vegetable spaghetti comes out of each fruit. Season with salt, pepper and butter and serve hot. Can also be served hot with catsup or tomato sauce or served cold, as a salad, with mayonnaise or French dressing. This remarkable vegetable is one of the most valuable and useful of recent introductions, and should be grown in every garden.

Pkt. 10c—3 pkts. 25c— $\frac{1}{4}$ lb. 60c

SPINACH

BLOOMSDALE SAVOY

Extra dark green strain. A new, beautiful better and darker strain. Its glossy green color gives the plants a fresh appearance for a longer time and it is quite early. The leaves are large, fleshy and deeply crumpled. The plants are of upright growth.

Pkt. 10c—3 Pkts. 25c—7 oz. \$1.00

MUSTARD

SOUTHERN GIANT CURLED

Leaves are large, light green, crimped and frilled at edges. The plant is upright or slightly spreading in growth. Can be eaten like lettuce or boiled for "greens." Highly valued on account of its vigorous growth, hardness and good quality.

Pkt. 10c—3 pkts. 25c; $\frac{1}{4}$ lb. 75c

PARSNIPS

Improved Hollow Crown

A great cropper and considered the best for cultivation. The roots are long, smooth, tender and very sugary.

Pkt. 10c—3 pkts. 25c

New Tree Tomato

A wonderful variety that grows upright better than any we have ever seen. Tomato firm, solid, thick flesh, large meaty centers. Fruit is purplish pink. Form always round and symmetrical and of medium size. Very productive. When tomatoes grow heavy, limbs will break unless supported.

Pkt. 10c—3 Pkts. 25c—1 oz. 45c

"HONEY DEW"

The Famous Melon

This is a cross between the Rocky Ford Cantaloupe and a South Sea Island Casaba. The melon is nearly white, turning to lemon-yellow when ripening, and the average size

is a little larger than that of a coconut. The flesh is light green, the juiciest and sweetest Musk-melon and luscious in flavor. The rind is hard. It is good as soon as picked off the vine and will keep good for months if kept in a cool, dry place. It is, therefore, a good shipper and a most splendid fruit to grow for the market. In the city markets, the Honey Dew sells at higher prices than any other melon. As a local melon, it advertises itself. The first one eaten creates a desire for more. Ripe fruits in 90 to 120 days, depending upon the season. Full-grown fruits that do not ripen on the vines before the fall frosts can be picked and will ripen in storage.

Pkt. 10c—3 pkts. 25c— $\frac{1}{4}$ lb. 40c

HALE'S BEST

Decidedly the earliest of the Rocky Ford type of shipping melons, and a most popular and profitable sort. Melons average as large as any of this class and have a sweet, sugary salmon flesh.

Pkt. 10c—3 pkts. 25c— $\frac{1}{4}$ lb. 40c

TOMATOES

GIANT OXHEART TOMATOES

Oxheart is a giant among tomatoes. It is smooth, thick, tender and almost seedless; frequently showing two inches thick without a seed cavity. Three pound specimens are quiet common. A pink tomato with a delicious mild flavor that every lover of fruit likes. For quality, it is unexcelled and, as it becomes better known, it is sure to be one of the most popular tomatoes yet introduced.

Pkt. 15c—2 Pkts. 25c—1 oz. 65c

BREAK-O-DAY TOMATOES

The Earliest Disease Resistant, Globe Shaped Scarlet Fruited, Meaty Tomato Yet Introduced

We are pleased to be able to supply our customers with seed of this wonderful Tomato, which is the result of the most recent and scientific research in tomato growing by Dr. Fred J. Pritchard of the U.S. Department of Agriculture. Break-O-Day is a hybrid from Marglobe and other earlier varieties. It ripens as early as Earliana, about two weeks earlier than Marglobe. The foliage is similar to that of the Earliana. The fruits are of the Marglobe type, deep globe shaped, solid, meaty, with but few seeds, and of a scarlet color. No acid; just full of delicious sweet, beautiful red meat. Break-O-Day not only starts bearing early, but is an abundant yielder throughout the entire season.

Pkt. 10c—3 pkts. 25c— $\frac{1}{4}$ lb. 60c

RUTGERS — The Ideal Tomato

Developed at the New Jersey Experiment Station and highly recommended for canning, market and home garden, and is particularly suited for the manufacture of a fine-flavored, high-colored Tomato juice. Fruits medium to large, similar to Marglobe, has thick outer and inner walls, with very small seed cavity. The flesh is firm and red. The plant is rather large. The natural abundance of foliage serves, as ample protection from sun scald of fruits when light, sandy soils are used.

Pkt. 10c—3 Pkts. 25c—1 oz. 40c

WHY NOT HAVE GORGEOUS BLOOMING FLOWERS THROUGHOUT THE SUMMER?

Dahlia-Flowered Giant Zinnia

This type bears flowers of mammoth size and in form like a perfect Decorative Dahlia. The plant is a strong grower and flower stems are long and stiff. This remarkable variety includes a complete range of delicate, bright and rich colors from white, yellow, lavender and rose to orange, scarlet and crimson. A wonderful cut flower.

Pkt. 10c—3 Pkts. 25c

GIANT ZANZIBAR PALM

Zanzibar-lensis Ornamental Foliage Plant

From seed of this variety, sown in the open ground in May, the plants are in full foliage early in July. They attain a height of 12 to 14 feet and form a perfect pyramid of foliage and brilliantly colored fruit, presenting a beautiful tropical appearance. Enormous leaves, 2 to 4 feet across, and highly colored light and dark green, coppery-bronze and dark green with reddish ribs. The plants are a repellent to Moles and the foliage is death to Japanese Beetles and Grasshoppers.

Pkt. 10c—Oz. 25c

CACTUS SEED

Cactus make most interesting house plants, extremely odd and curious, and many have gorgeous and beautiful blossoms sweet scented, and blooming profusely. These oddest of all plants grow in many shapes and sizes, are easily grown, thrive and bloom with very little care, and endure the heat and dryness of the ordinary living room. Much pleasure may be derived in growing them from seed. Everyone is delighted and surprised at the odd appearance of a Cactus just sprouting. If you desire a fine collection of rare varieties, sow the seed in

pots or boxes in a warm room in moist sand, and the seed will grow quickly. We have fresh seed of a mixture of choice varieties. Pkt. 10c—3 Pkts. 25c

MORNING GLORIES

HEAVENLY BLUE

The finest of all Morning Glories. Immense flowers measuring 5 inches in diameter; bright sky blue color with a white throat.

Pkt. 10c—3 Pkts. 25c

SCARLETT O'HARA

A new color in Morning Glories—rich dark wine red of deep crimson. Flowers about 4 inches across. Freely produced on fast growing vines, and stay open longer than other varieties, many until in the afternoon. A blaze of brilliancy which will make it one of the most popular varieties.

Pkt. 15c—2 Pkts. 25c

PROSO

THE WONDER EGG AND MEAT PRODUCING GRAIN for Poultry

Here is a new Poultry Grain which owes its origin to Russia, that enables you to raise your own feed. If you only have a small plot of ground, you can make an enormous crop. Proso is unlike anything you have ever seen in this country. It grows more rapidly and matures quicker than other grains. It reaches a height of three to four feet, stools and branches, making fifteen to twenty-five heads instead of one. That is why it yields such enormous crops from such unbelievably small plots of ground.

Wonder Egg and Meat Producer for Chickens, Ducks and Geese

Proso makes a splendid mash when ground alone. When feeding with corn or oats the ratio should be four parts Proso to one other grain. It may be fed in bundles as the kernels are readily scratched out of the heads, or it may be fed as clean grain from the thresher. Produces more eggs and meat per bushel than ordinary grains.

Fine for Hogs, Cattle and Sheep

Grows Anywhere—May Be Planted Late Although a native of Russia, Proso does better, grows faster and matures quicker in our climate. During the fifteen years it was first introduced in this country, it has become acclimated so that it now grows here just as well as our native crops. It may be planted any time after corn planting time up to the middle of July.

7-oz. pkg. 45c—2½ lbs. \$1.20—5 lbs. (1 acre sowed in drills) \$2.00—12½ lbs. (1 acre broadcast) \$4.00—25 lbs. \$7.00

ANGEL'S TRUMPET

Large tropical leaves with trumpet-shaped flowers—pure white and as fragrant as jasmine. Blooms indoors in winter, and in the garden in the summer.

Pkt. 10c

3 Pkts. 25c

BIRD OF PARADISE

The color of the flower is a rich golden yellow. It measures 2¼ inches across and is produced in very large trusses. The most beautiful part of the flower is the long incurved stamens and pistils which are spread out in fan-like form and are of bright crimson color. The color is also highly decorative. It should be grown as a house plant, except in the warmer parts of the South, where it is hardy. If the seeds are started early, it will produce blooms in great profusion the first year.

Pkt. 10c—3 Pkts. 25c

GIANT PANSY

Giant-sized flower of most striking character, each petal being conspicuously curled or waved, giving them the effect of a double flower. The colors are mainly rich dark shades, bordered, blotched, or marked in the ray-like veinings with contrasting colors. Bloom freely and continuously as long as weather remains cool.

Pkt. 20c — 3 Pkts. 50c

BLUE LILY

BLUE LILY OF THE NILE

A splendid ornamental plant with bright evergreen foliage spreading 3 or 4 feet surmounted with spikes of bright blue flowers which remain in bloom for a long period. It is a most desirable tub plant for porch or lawn. Should be wintered in the cellar or greenhouse

AMARANTHUS (Rainbow Plant)

TRICOLOR (Joseph's Coat). Beautiful plant, growing 3 to 5 feet high, with ornamental leaves variegated in red, yellow and green. The large attractive flower-heads are bright crimson. Pkt. 10c—3 Pkts. 25c

ALYSSUM

Sweet (Maritimum) Of spreading growth, averaging 8 in. in height. Pure white, honey-scented flowers completely cover the plants. Pkt. 10c; ½ oz. 20c; oz. 35c 4 ozs. \$1.00

COLORED VERBENAS

Mammoth—Flowered.

Mixture. Fine, rich-colored blend.

Pkt. 10c—3 Pkts. 25c

UMBRELLA PALM

Not a true palm, but handsome ornamental plant-like plant. Grows in water or soil. Indispensable for aquariums, fountains or pools.

Pkt. 15c—2 Pkts. 25c

MEXICAN FIRE PLANT

(Annual Poinsettia)

A variety of Poinsettia which grows quickly to a height of 2½ to 3 feet from seed sown in the open during May. About the middle of summer, the top central leaves turn to rich orange-scarlet, similar to the famous green-house variety of Poinsettia which is so popular about Christmas time. A blaze of glory throughout the summer and fall. Can also be grown as a house plant.

Pkt. 10c—3 Pkts. 25c

MIXED PETUNIAS

This mixture contains a good range of brilliant and impressive colors and these hardy plants retain a continuance of blooms until frost. Their blazing array of color makes any display an object of admiration and beauty when stocked with these vigorous and profuse growers.

Pkt. 10c—3 Pkts. 25c

VEGETABLE PLANTS

SWEET POTATOES

You can't grow a good profitable crop of Sweet Potatoes unless you start with good healthy slips. All our plants are carefully inspected and certified and are guaranteed to please you. Set in rows 3 feet apart; plants 12 inches apart. Set about 7,000 plants to an acre. Shipments commence about April 25 and continue until July 1, weather permitting. Send your order early. Strong, Healthy, Certified. Two excellent varieties: Nancy Hall and Golden Porto Rico, Postpaid: 100 for 40c; 500 for \$1.25; 1,000 for \$2.00; 5,000 for \$8.75; 10,000 for \$17.50. Ready for shipment April 25. Order now and tell us what date you want them shipped.

Benton County Nursery's SEEDS AND PLANTS ARE SPARKLING WITH VITALITY

NEW LOW PRICES

All of our plants are open-field grown and cared for in every way to produce hardy, healthy plants. They are grown from the finest seed obtainable, and guaranteed to be absolutely free from any disease or insects. Open-field grown gives you stronger, weather-resistant plants that will thrive the minute you set them out. You get No Hot House Plants from us only true to type open-field grown hale and hearty plants.

PRICES POSTPAID BERMUDA ONION PLANTS

Sturdy, healthy plants ready to ship about now. Guaranteed free from disease. Grow onions this easy way.
